II. JURISDICTION AND VENUE

16. This is an action for infringement of a United States patent under 35 U.S.C. § 271 and § 281. This Court has exclusive jurisdiction of such action under 28 U.S.C. § 1338(a).

17. Plaintiff is informed and believes, and thereon alleges, that each and all of the Defendants have committed acts of patent infringement alleged herein within the Marshall Division of the Eastern District of Texas.

18. Upon information and belief, each and all of the Defendants have sufficient minimum contacts with the State of Texas and the Marshall Division of the Eastern District of Texas such that this Court has personal jurisdiction over each and all of the Defendants and this is a fair and reasonable venue for the litigation of this action. Each of the Defendants has committed such purposeful acts and/or transactions in Texas that it reasonably should know and expect that it could

be haled into this Court as a consequence of such activity. Upon information and belief, each and all of the Defendants have transacted business, and at the time of the filing of this Complaint are transacting business, within the Marshall Division of the Eastern District of Texas. For these reasons, personal jurisdiction exists and venue is proper in this Court under 28 U.S.C. §§ 1391(b) and (c) and 28 U.S.C. § 1400(b).

19. Further, venue of this action is appropriate and convenient in the Marshall Division because this Court previously heard a parallel action for infringement of the same ‘474 Patent-in-suit, in *Geomas (International), Ltd., et al. vs. Idearc Media Services-West, Inc., et al.*, Civil Action No. 2:06-CV-00475-CE, in the United States District Court for the Eastern District of Texas, Marshall Division (“the Geomas Lawsuit”). In the Geomas Lawsuit this Court considered and construed the terms and claims of the present patent-in-suit, as set forth in the Court’s claim-construction (or *Markman*) Memorandum Opinion and Order issued on November 20, 2008.

III. PATENT INFRINGEMENT

20. On July 27, 1999, United States Patent No. 5,930,474 (“the ‘474 Patent”) was duly and legally issued. The ‘474 is titled “Internet Organizer for Accessing Geographically and Topically Based Information” and is directed to a software interface which organizes information based on the geographical area of the resources about which the information is desired.
